

One day workshop on Product Life Cycle Management (PLM) in collaboration with Design Tech Systems Ltd and SIEMENS organized on 21st March 2013

This workshop was organized for faculties /Students / Professionals to get exposed to new software driven technology Product Life Cycle Management (PLM). This is a new emerging area in the field of Mechanical Engineering. PLM encompasses the complete product information right from cradle to Grave. PLM facilitates concurrent engineering and thereby automates the new product development process. This workshop created the footprints of PLM in academics. At the end of the day students & faculty were sensitized to include this as an elective in academics and at PG level too. In the afternoon session the participants were trained on the actual software to get hands on experience. The workshop ended with vote of thanks given by Dr. S. B. Rane.

Chief Guest: Dr. P. H. Sawant (Principal SPCE)
