

## Green Talk by Indian Green Building Council (IGBC) Mumbai Chapter

Indian Green Building Council (IGBC) Mumbai Chapter organized a Green Talk in memory of Dr. Prem Jain, the father of Green Buildings in India under the Harit-Prem Bharat Mahotsav, 2023.

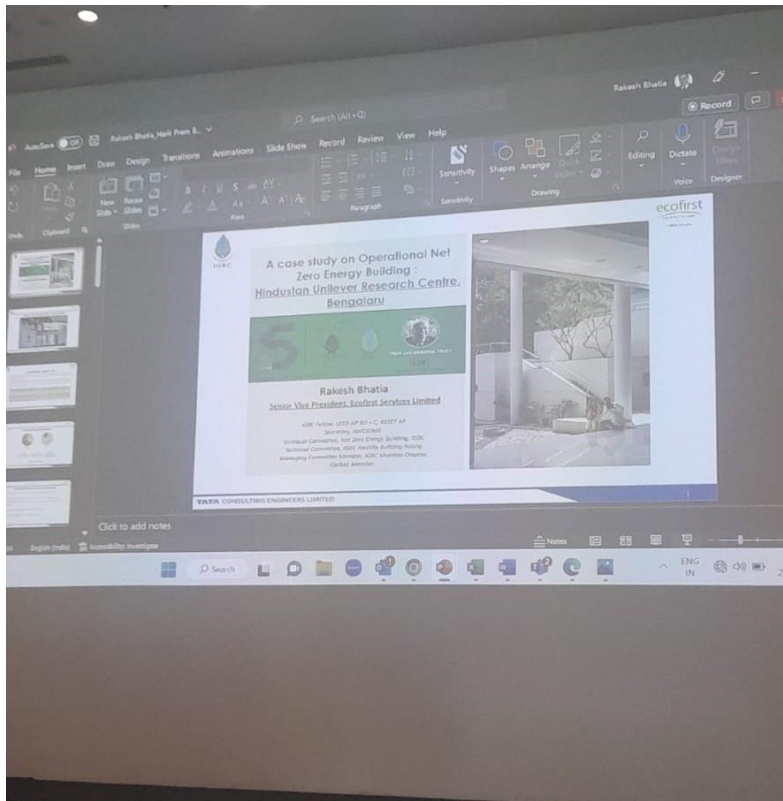

The ceremony began with the introduction of Dr. Prem Jain and his glorious service to the nation through the path of sustainable development. With the mission of Holistic Green Living, various speakers of the event began to present their views and opinions on sustainable development and the need for green buildings. The event put a heavy emphasis on the importance of creating a Green Bharat. Surprisingly, India recorded 5.7 Billion sq. ft of Green footprint by September 2018.

Case studies were presented to us on Unilever and Godrej to understand the leverage of Net-zero Energy Building. It was a wonderful session with a lot to take back home. We learned a lot of new terms in sustainability and it helped us get a broader view of the Environment and its community.

Today, the "Green Bharat" story is unparalleled amongst members of the World Green Building Council.

Members of Student Sustainability Chapter of Sardar Patel College of Engineering with an IGBC Member, Bhavesh Sir

Case Study on Unilever

Engrossed in the Wonderful session
